SanDisk® Automotive Embedded Storage Solutions

Product Highlights
- High reliability, automotive grade storage solution
- Capacities: 8 – 64GB
- Automotive Grade 2 and 3 temp ranges: –40°C to 85°C/–40°C to 105°C
- e.MMC 5.1 HS400 standard
- Core voltage: 2.7V to 3.6V
- Host voltage of 1.7–1.95V or 2.7–3.6V
- Advanced memory management firmware features including ECC, wear leveling, bad block management
- Advanced automotive feature set including advanced health status monitor, enhanced power immunity, low power consumption, manual and automatic data refresh, fast boot, flexible EUDA, OEM configurable boot and RPMB partitions
- SLC cache, refresh and other features optimized for a wide variety of read and write use cases

Product Quality and Reliability
- AEC-Q100 qualification
- Production Part Approval Process (PPAP) documentation
- Extended PCN/EOL notices
- Low DPPM with zero defect strategy, special manufacturing process and enhanced controls
- More than 27 years expertise in NAND flash development and system design
- Full vertical integration of design, manufacturing, assembly, test, reliability analysis and monitoring — supporting the entire product life-cycle

Serving Multiple Automotive Applications
Ideal on-board storage solution for various automotive applications:
- Navigation/Infotainment Systems
- Advanced Driver Assist Systems (ADAS)
- HD Mapping
- V2V/V2I Communications
- Digital Clusters
- Event/Drive Recorders
- Autonomous Drive
- Telematics and Over-the-Air Update

Reliable Edge Storage in a Connected World

The automotive industry is on the cusp of a disruptive technology phase — cars are not simply mechanical engines but are computers on wheels driving a next generation of hardware and software requirements. As cars become connected and autonomous, massive amounts of data are being created and consumed. Reliable, high capacity managed NAND is the ideal solution for this data to be stored and analyzed. SanDisk offers a proven portfolio of automotive grade products designed for the evolving requirements of the connected automotive market.

Vertically integrated, SanDisk owns all critical steps of the design and production process — ensuring industry leading quality and reliability. Managed NAND solutions from SanDisk leverage over 27 years of flash storage innovation and over 5,000 patents. SanDisk Automotive flash storage solutions and support provide reliability, performance and peace of mind that enable next generation advanced automotive applications.

For detailed product information, please contact SanDisk sales or distribution.
